Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 9 is rejected under 35 U.S.C. 102(e) as being clearly anticipated by US Patent 6517914 ("914"). See scattering sheet and column 4, lines 42-55 "the luminance distribution can be uniformized without compromise in the luminance of the image displayed."

Allowable Subject Matter

Claims 1-8 and 10-11 are allowed.

The prior art of record does not teach nor suggest a display apparatus comprising: view angle dependence correction means for correcting view angle dependence of the relationship between a standardized input signal and standardized output luminance so that S defined by a relational expression: $S = 0 \times \max g(x) - g'(x) \times (x \max : \text{maximum of } x)$ where x is the standardized input signal, $g(x)$ is standardized output luminance observed from the front, and $g'(x)$ is standardized output luminance observed in a predetermined oblique direction is smaller than a fixed value S_0 at an arbitrary view angle falling within a predetermined view angle range.
